

APPENDIX A - MNDNR DATA CATALOG

Technical Memorandum

To: Linda Loomis, Administrator
Lower Minnesota River Watershed District

From: Lan Tornes, Natural Resources Scientist
Della Schall Young, CPESC, PMP

Date: April 30, 2020

Re: Calcareous Fen Data Received from the Minnesota Department of
Natural Resources

The following files containing data and information were provided by the Minnesota Department of Natural Resources (MNDNR) ca. 2018. The information has been updated to show additional information that was provided in late 2019 and early 2020 from the MNDNR and the Metropolitan Council of Environmental Service. These were the source for much of the information summarized and interpreted in this report. The Folder Directory column corresponds to the location or site and type of information contained therein. The File Name is what the original creator of the file called it with the intent to indicate the contents of the file. The extension of the File Name indicates the software that should be used to open the file; i.e. PDF, portable document format; XLS, Microsoft Excel. The Date Saved is the date the file was last modified and saved; it may not be the file creation date and may not be original date.

There is considerable redundancy in these files. Copies of the same file will be found in multiple directories because they are relevant to the more than one location or site. Most of the MS-Excel files are raw, generally unlabeled downloads from data loggers and were not directly applicable to the report.
