

LOWER MINNESOTA RIVER WATERSHED DISTRICT

Executive Summary for Action

Lower Minnesota River Watershed District Board of Managers Meeting

Wednesday, February 21, 2024

Agenda Item

Item 4. B. – Presentation og Fen Stewardship Plan

Prepared By

Linda Loomis, Administrator

Summary

Young Environmental has been developing a LMRWD Stewardship Plan for the calcareous fens located within the boundaries of the LMRWD. The first steps in the development of the plan were to undertake a gap analysis to determine if additional data was needed to develop the Plan. Relevés were conducted. A relevé is a type of analysis where a number of small plots of vegetation are analyzed as a sample of a wider area. Well monitoring data was analyzed and considered.

The DNR was included in the development of the plan, although participation by the DNR was limited because of funding availability.

The Plan is now ready to present to the Board. The final report will be available for approval by the Board at the March Board of Managers meeting.
